EXAMINER

KRAMER, DEVON C

ART UNIT PAPER NUMBER

3683

DATE MAILED: 08/18/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/757,634	Applicant(s) RENAUDOT, JEROME	
	Examiner Devon C Kramer	Art Unit 3683	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 January 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-6 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-6 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 14 January 2004 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☒ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Priority

1) Acknowledgment is made of applicant's claim for foreign priority based on an application filed in France on July 2, 2002 and July 27, 2001. It is noted, however, that applicant has not filed a certified copy of the two application as required by 35 U.S.C. 119(b).

Information Disclosure Statement

2) The information disclosure statement (IDS) submitted on 1/4/04 has been considered by the examiner, but the second listing is in error. It should state – 4,856,812—instead of “3,856,812”. Please note that these changes have been made by the examiner on the signed copy of the IDS.

Drawings

3) The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference character(s) mentioned in the description: The bottom part (10) cited on page 7 line 17 is not shown. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing

Art Unit: 3683

figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4) The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "7" has been used to designate both the foot and the rigid arm in the specification. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

5) The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6) Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raidel (4541653) in view of McKenzie et al (2001/0008333).

In re claims 1 and 3, Raidel provides a pneumatic front suspension assembly for an industrial vehicle comprising: a front axle (34) linked to a pair of side members (32);

Art Unit: 3683

a pair of air bags (col. 1 lines 59-63, col. 2 lines 43-46) and on each side: a rigid arm (22) of which one extremity is articulated (figure 2) relative to a side member and of which an other extremity receives the axle and a bottom part of one of the air bags; a pair of links (figure 3) mutually articulated about a pin substantially parallel to the axle, an upper link of these the pair of links being articulated relative to the side member, a lower link of the pair of links being articulated relative to the rigid arm and a basically U-shaped additional element forming an anti-roll bar (48), comprising: a transverse rod linked to the lower link at an articulation point of the lower link with the rigid arm. Raidel teaches the anti-roll bar integral with the links. Raidel is silent to the air bags adjusting the height of the axle relative to side member.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have provided a separate upper and lower link and roll bar in Raidel since it has been held that where it is desireable to replace just one part of an assembly that was previously integral, it would be obvious to make the items separable for that purpose. In re Dulberg, 289 F.2d 522, 523, 129 USPQ 348, 349 (CCPA 1961) Please note that it may be desirable to replace the lower link in Raidel without replacing the roll bar.

McKenzie et al teaches an air spring adjusting the height of an axle relative to a side member. (Abstract)

It would have been obvious to one of ordinary skill in the art at the time of the invention to have provided the suspension of Raidel with an air spring where the height can be changed as taught by McKenzie et al merely to change the feel of the

Art Unit: 3683

suspension when carrying different loads and to set the ride according to a drivers preference or road conditions.

In re claim 2, see figure 2 of Raidel.

In re claim 4, see item 46 of Raidel.

In re claim 5, figure 1 of Raidel shows the rigid arm extending from an above view, where the air bag is situated on item 26. Item 26 is considered part of the rigid arm and has a width, as seen by the dashed line, that is greater than that of the rest of the rigid arm.

7) Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Raidel (4541653) in view of McKenzie et al (2001/0008333) and further in view of Vandenberg (5690353).

Both Raidel and McKenzie lack the teaching of a broadened area made integral with an upper face of the axle.

Vandenberg teaches a broadened area made integral with an upper face of the axle. (Figure 2A)

It would have been obvious to one of ordinary skill in the art at the time of the invention to have provided the suspension of Raidel as modified by McKenzie with the broadened area, where the air spring sits, integral with the upper face of the axle merely as a design choice and to provide the spring device at the exact point where the vehicle is absorbing forces (axle).

Conclusion

Art Unit: 3683

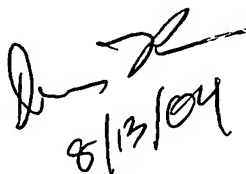

8) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hedenberg ('171, '572,), Stuart, Fenton, Mitchell, Barlas et al, Dudding, VanDenberg and Chalin et al all provide suspension devices similar to the instant application.

9) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Devon C Kramer whose telephone number is 703-305-0839. The examiner can normally be reached on Mon-Fri 8-4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Lavinder can be reached on 703-308-3421. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
